

Percentage of customers assigned to each sales agent

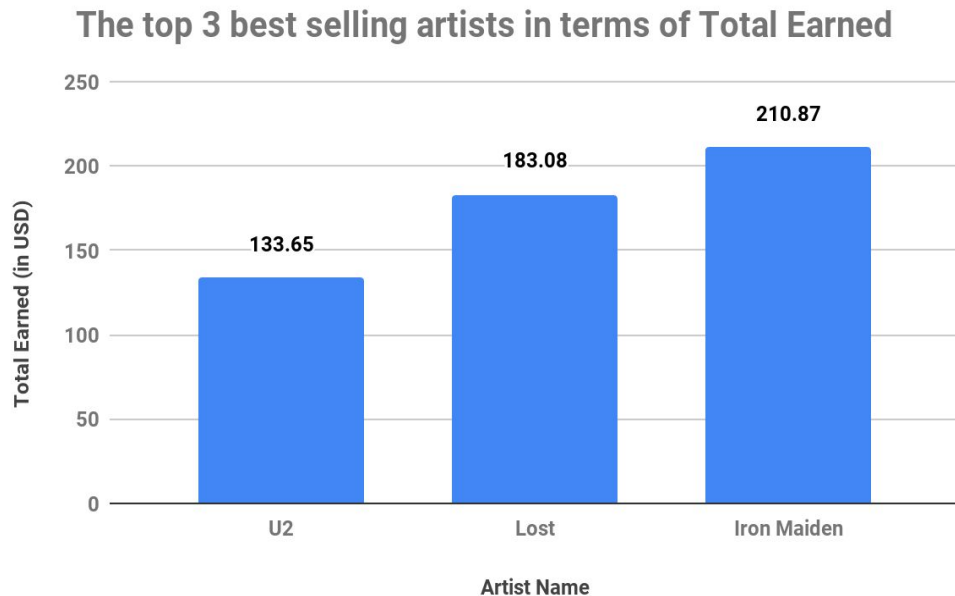

Percentage of customers assigned to each sales agent

We can see that each sales agent has assigned approximately equal percentage of Customers with Jane Peacock Getting the most percentage of Customers equal to 35.6%.

There is around 2-3% of difference in each of them (if customer base is large this can be a significant difference).

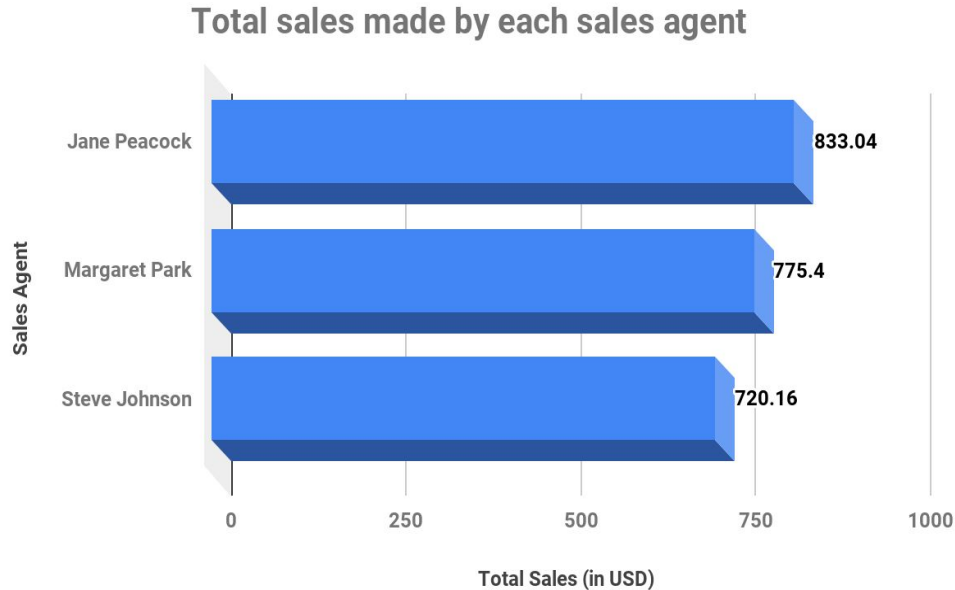

The top 3 best selling artists in terms of Total Earned

Here is the pictorial representation of The top 3 best selling artists in terms of Total Earned by them.

We can clearly see the best selling artist is Iron Maiden with 210.87 USD and the second position is hold by Lost with 183.08 USD and third is U2 with 133.65 USD.

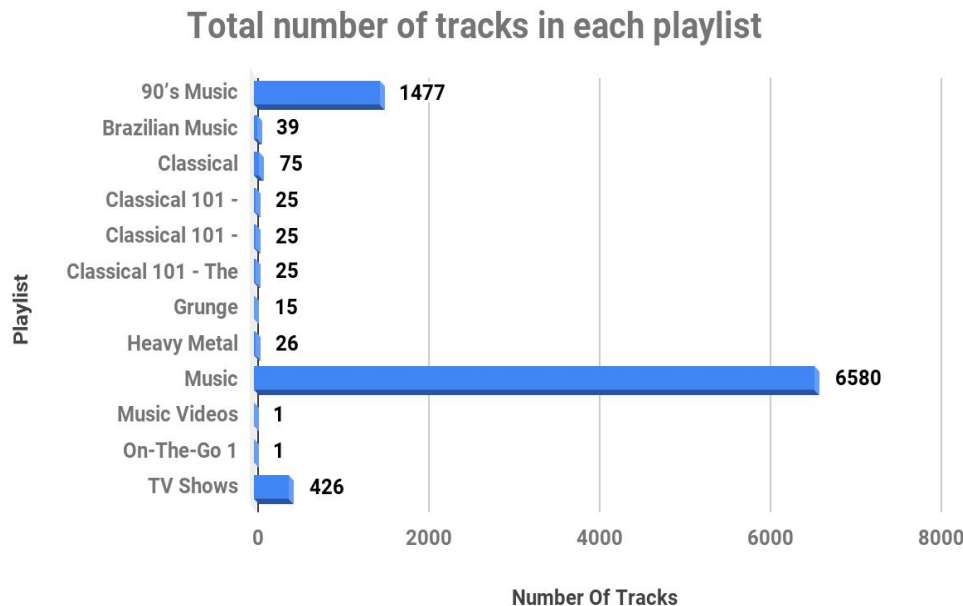

Total sales made by each sales agent

Here is the pictorial representation of Total Sales made by each sales agent in USD.

We can see there is a difference of around 50 USD in each of them and this can be due to the difference in percentage of customers (2-3 % difference) assigned to them which i explained in first slide.

Total number of tracks in each playlist

Here is the pictorial representation Total number of tracks in each Playlist.

We can see there is some playlist having large number of tracks like Music but most of the playlist doesn't even come close to them and they has significantly lower number of tracks plus there are two playlists Music Videos and On-The-Go as well who have only 1-1 number of tracks in compare of 6580 in Music Playlist.
